

NO STREAK OF YELLOW TO BE FOUND IN THE RADIUM BASEBALL TEAM.

In order to clear up the misunderstanding regarding the ball game advertised for July 25th at Warren, Radium vs. Forest River, some people have the opinion that there was a streak of yellow in the make-up of the Radium ball team, but this is not the case.

The game was well advertised at Warren, Radium and various other neighboring villages but for financial or other reasons (probably crossed trolley wires), the management of the Warren ball park induced or tried to induce the Winnipeg Colored Giants and Hallock to play there and booked them for the same date and as the understanding was that Sunday games must be played between 3 p. m. and 6 p. m. at that place, there was no prospect of playing the game after the Hallock-Giants game unless it was a short game which would not have been satisfactory to either the Forest River or Radium teams, nor to those that had paid their good hard cash to see a game.

Later, after the Winnipeg Giants had notified the management at Warren

that they could not fill the date as billed we were asked to play our game as was advertised, but this was impossible considering the short notice as the Forest River team had disbanded and could not get together for that date.
